EDUCATION

NIST University, Berhampur, Odisha

Aug 2024 – Present

B.Tech in Computer Science & Engineering (AI & ML) — CGPA: 8.7

OAV Sidheswar, Odisha

Class XII (Science) — Percentage: 81.4%

PROJECTS

ApeX (DEX) | [GitHub](#) | [Live Demo](#)

React, TypeScript, Node.js, Tailwind CSS

- Built a Solana-based perpetual futures trading platform enabling users to open leveraged positions and trade crypto assets such as BTC, ETH, and SOL.
- Developed on-chain trading logic using Rust and Anchor, implementing order execution, position management, margin requirements, liquidation, and settlement mechanism.
- Created a real-time trading interface using Next.js, React, and TypeScript, integrating Pyth price feeds, interactive candlestick charts, wallet connectivity, and order management.
- Integrated PostgreSQL with Solana smart contracts and market-data services to manage trade history, positions, and real-time updates while maintaining a responsive trading experience.

Coin Tracking | [GitHub](#) | [Live Demo](#)

Next.js, TypeScript, Tailwind CSS, CoinGecko API

- Built a real-time crypto tracking platform for monitoring prices, trends, and major assets like BTC, ETH, and SOL.
- Integrated CoinGecko API for live prices, market cap, volume, and historical market data.
- Developed a responsive Next.js, React, and TypeScript dashboard with charts, search, and coin statistics for market analysis and data visualization for tracking real-time and historical price movements.

HaX | [GitHub](#) | [Live Demo](#)

React, TypeScript, Node.js, Tailwind CSS

- Built a hackathon discovery platform enabling users to discover, track, and explore hackathons worldwide, with a focus on opportunities in India.
- Developed an automated scraping pipeline using Node.js and Playwright to collect hackathon data from multiple sources and normalize, classify, and deduplicate listings.
- Implemented automated daily updates and push notifications using GitHub Actions and ntfy.sh to notify users about newly discovered hackathons.

TECHNICAL SKILLS

Languages: C, C++, JavaScript, TypeScript, SQL, Solidity

Frameworks & Libraries: Next.js, React.js, Node.js, Express.js, Tailwind CSS, shadcn/ui

Core CS: Operating Systems, Data Structures & Algorithms, Object-Oriented Programming, Debugging

Blockchain & Web3: Web3, Solana, Ethereum, Solidity

Tools & Platforms: Git, GitHub, Git Bash, VS Code, Vim, Postman, Docker

EXTRACURRICULAR ACTIVITIES

- Member, Cloud Computing Club, NIST University.
- Enjoy playing cricket; follow tennis and F1.
- Avid reader; enjoy spending free time reading books.
- Currently Reading — Harry Potter & the Philosopher's Stone.
