PROFILE

Computer Science student specializing in AI and ML, focused on full-stack products, real-time dashboards, and Web3 applications. Comfortable building with Next.js, React, TypeScript, Node.js, PostgreSQL, Rust, and Solana smart-contract tooling.

EDUCATION

NIST University, Berhampur, Odisha Aug 2024 - Present
B.Tech in Computer Science & Engineering (AI & ML) - CGPA: 8.7
OAV Sidheswar, Odisha
Class XII, Science - Percentage: 81.4%

PROJECTS

ApeX - Perpetual Futures DEX [GitHub](#) | [Live Demo](#)
React, TypeScript, Next.js, Node.js, Tailwind CSS, Rust, Anchor, PostgreSQL

- Built a Solana-based perpetual futures trading platform for leveraged BTC, ETH, and SOL positions.
- Implemented trading primitives in Rust and Anchor, including order execution, position management, margin requirements, liquidation, and settlement.
- Built a real-time trading interface with wallet connectivity, Pyth price feeds, candlestick charts, order management, and PostgreSQL-backed trade history.

Coin Tracking - Crypto Market Dashboard [GitHub](#) | [Live Demo](#)
Next.js, React, TypeScript, Tailwind CSS, CoinGecko API, Chart.js

- Built a responsive crypto tracking platform for real-time prices, market trends, and major assets such as BTC, ETH, and SOL.
- Integrated the CoinGecko API for live prices, market capitalization, trading volume, and historical market data.
- Designed dashboard views with search, charts, and coin statistics to make real-time and historical price movement easier to analyze.

HaX - Hackathon Discovery Platform [GitHub](#) | [Live Demo](#)
React, TypeScript, Node.js, Playwright, GitHub Actions, Tailwind CSS

- Built a hackathon discovery platform for finding, tracking, and exploring hackathons worldwide, with a focus on opportunities in India.
- Developed a Node.js and Playwright scraping pipeline to collect listings from multiple sources, then normalize, classify, and deduplicate the data.
- Automated daily updates and push notifications with GitHub Actions and ntfy.sh to alert users about newly discovered hackathons.

TECHNICAL SKILLS

Languages	C, C++, JavaScript, TypeScript, SQL, Rust, Solidity
Frontend	Next.js, React.js, Tailwind CSS, shadcn/ui, Chart.js, responsive UI
Backend & Data	Node.js, Express.js, PostgreSQL, REST APIs, WebSocket, API integration
Blockchain	Solana, Anchor, Ethereum, Web3, smart-contract integration
Core CS	Data Structures & Algorithms, Operating Systems, OOP, debugging
Tools	Git, GitHub, Git Bash, VS Code, Vim, Postman, Docker, Playwright

ACTIVITIES

- Member, Cloud Computing Club, NIST University.
- Avid reader; currently reading Harry Potter and the Philosopher's Stone.
